# HUSHLIGHT

## An Automated Noise-Deterrent Device for Shared Living

PROJECT PROPOSAL • GROUP 19

Andrew L. | Aarush P. | Jonas P. | Kelly T. | Alan Y. | Alan Z.

# AGENDA

## Problem

The persistent challenge of noise conflict in shared student living spaces

## Landscape

Evaluating the current "monitoring-only" competitive market gap

## Solution

Introducing HushLight

## Insights

Target customer demographics and product price point

# OUR PROBLEM

For students, noise is more than a bother; it's a productivity and rest killer. Verbal requests to “be quiet” are awkward, carry social risk, and often easily forgotten.

**Shared living spaces, such as university dorms. Lack a neutral, automated third-party intervention that acts in the moment.**

# QUANTIFYING THE ISSUE

**25%**

of All Housing Grievances

**Market Problem**

Noise-based complaints account for about a quarter of all grievances in student housing. Despite this, existing solutions target property managers and short-term renters (Airbnb, Vrbo, etc).

This creates an opportunity for a consumer-focused product

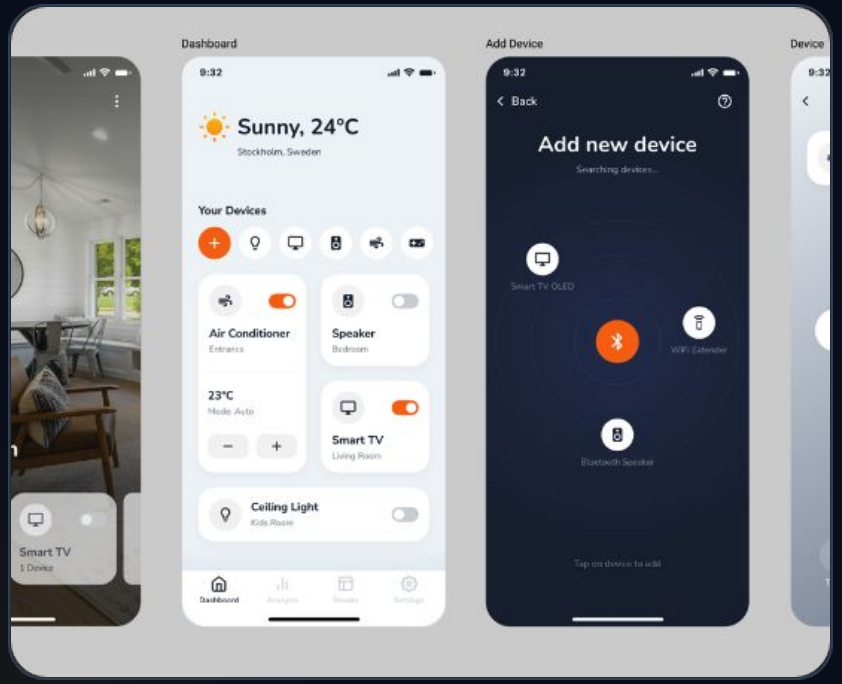
# HUSHLIGHT SOLUTION

**Active Deterrence**

When decibel levels exceed a pre-set threshold, the device triggers a bright, hard-to-ignore light at the source of the noise.

- Real-time Noise Monitoring
- Immediate Visual Feedback
- Fully Autonomous Operation

# HUSHLIGHT SOLUTION - Reach Feature



**Companion Mobile App**

Allows users to customize their quiet environment.

- **Thresholds:** Set custom dB levels
- **Scheduling:** Auto-quiet hours
- **History:** Track noise trends over time
- **Silent Mode:** Notification-only button

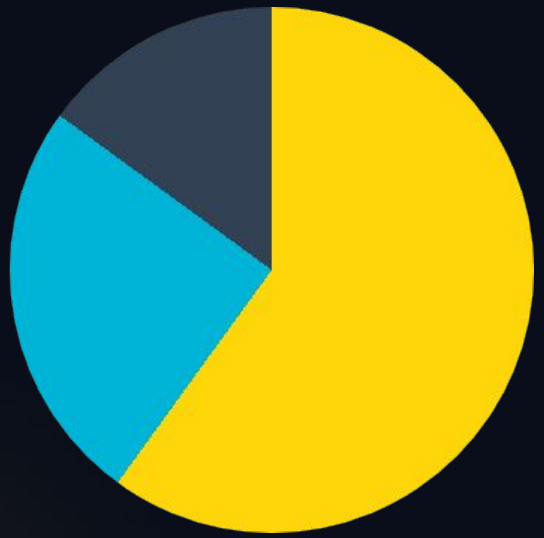
# COMPETITIVE LANDSCAPE

| Features | NoiseAware | Minut | Headphones | White Noise | HushLight |
|---|---|---|---|---|---|
| Monitors noise levels | ✓ | ✓ | ✗ | ✗ | ✓ |
| Works for the resident | ✗ | ✗ | ✓ | ✓ | ✓ |
| No subscription required | ✗ | ✗ | ✓ | ✓ | ✓ |
| Under $50 | ✗ | ✗ | ✗ | ✓ | ✓ |
| Stops noise at source | ✗ | ✗ | ✗ | ✗ | ✓ |

**The Gap:**

Existing solutions either monitor noise for landlords or help you block it out personally. HushLight brings noise monitoring to residents and addresses day-to-day noise issues by stopping them at the source — a shared-space reminder that prompts roommates to quiet down.

# MARKET BREAKDOWN



## Primary Customers

**60% College Students:** Individuals in dorms/apartments needing focus.

## Secondary Customers

**25% Shared Housing:** Young adults and family homes.

**15% Administrators:** University housing and property managers.

# CUSTOMER INSIGHTS

**<$50**

Consumer Price Point

### Designed for Student Budgets

To capture the massive college market, HushLight is engineered to be a high quality product at an affordable price.

**Plug & Play**

Easy setup in 5 mins.

**Subtle**

Sleek, small design.

# Questions?

HushLight: Peace of mind for shared living.
